

Firewise

Firewise is a project of the National Fire Protection Association. To save lives and property from wildfire, NFPA's Firewise Communities program teaches people how to adapt to living with wildfire and encourages neighbors to work together and take action now to prevent losses. We all have a role to play in protecting ourselves and each other from the risk of wildfire.

[Texas A&M Forest Service:](#)

Preparing for wildfires; People and their activities cause more than 90 percent of all wildfires in Texas. The largest number of human-caused wildfires is a result of careless debris burning. Other causes of wildfires include sparks from welding and grinding equipment, carelessly discarded smoking materials, vehicles' exhaust systems, lightning, powerlines and arson.
